

Don't Replace it,
Rebuild it.

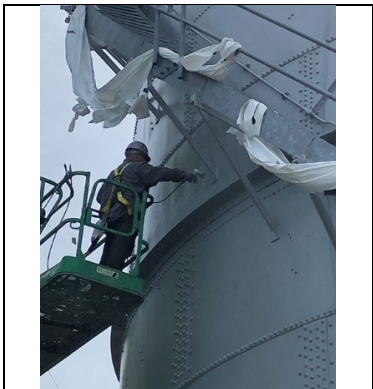

Project: Surge Tank Recoating (Exterior)
Year Completed: 2020

CTI provides their customers with solutions specific to their challenges and most importantly, in a safe and sustainable manner.
For this specific project the customer requested the surface preparation and recoating (exterior) of a 56-foot tall, 40-foot diameter Surge Tank. They were looking for a coating system that would provide UV and Corrosion protection while at the same time being aesthetically pleasing.

CTI first needed to make sure the crew could work as safely and efficiently as possible. CTI utilized two 60' JLG Lifts to access, prepare, and coat the Surge Tank, utilizing their certified and experienced operators.
